Pekanbaru, Riau, 28292

Information Systems graduate with a proven track record in leading website development projects and active involvement in organizational initiatives. Skilled in team leadership, web development (PHP & JavaScript frameworks), and cloud computing solutions. Passionate about leveraging technical expertise to drive innovative projects. Seeking roles as a Full Stack Developer, Front-End/Back-End Developer, Project Manager, Project Leader, or Cloud Engineer.

WORK EXPERIENCE

Computer Laboratory of Information Systems, UIN Sultan Syarif Kasim Riau

Sep 2024 - Mar 2025

Full Stack Developer - Project-Based Internship

- Developed ILMIS (Integrated Laboratory Management Information System) as part of the undergraduate thesis.
- Optimized user interface and system performance, resulting in 30% faster page load times.
- Designed and implemented a laboratory scheduling feature that reduced schedule conflicts by up to 90%.
- Integrated three different websites and databases into a unified system using a centralized database.
- Developed a Single Sign-On (SSO) authentication system that accelerated the login process by 60%.
- Documented the entire development process to facilitate developers in future enhancements.

PROJECT EXPERIENCE

Foodinary Project – [Github Repository](#)

Mar - Jun 2025

Project Leader and Front-end Developer

- Developed an AI-powered website using to identify traditional Indonesian cuisine from food photos.
- Led a 5-member team and completed the project 100% on time and according to the target.
- Structured project workflow using Notion and delegated tasks based on each member's technical expertise.
- Facilitated regular evaluations and resolved obstacles to maintain smooth project progress.
- Converted UI/UX designs from Figma into website code using pure HTML, CSS, and JavaScript.
- Developed responsive web layouts compatible with multiple device screens.
- Configured and optimized development processes using Webpack to accelerate workflow.

Daisy Project – [Github Repository](#)

Sep 2024 - Jan 2025

Project Leader and Back-end Developer

- Developed an AI-based Android application for detecting skin diseases.
- Led a 6-member team and completed the project 100% on time and according to the target.
- Structured project workflow using Notion and delegated tasks based on each member's technical expertise.
- Facilitated regular evaluations and resolved obstacles to maintain smooth project progress.
- Designed and implemented backend infrastructure using Node.js and developed secure authentication APIs.
- Managed system deployment using Firebase and Google Cloud Run.

Sistem Informasi Inventaris Laboratorium (SITARIS) - [Website](#)

Mar - Nov 2023

Project Leader & Full Stack Developer

- Developed a system for equipment logging, loan tracking, and asset maintenance management.
- Led a 3-member team and was responsible for feasibility studies, system analysis, and implementation.
- Developed the system using CodeIgniter 4, PHP 8, and MySQL, ensuring user-friendliness for laboratory staff.
- Designed a database to manage hundreds of equipment records, enabling efficient asset search and tracking.
- Deployed and hosted the system on the university's official server with the domain uin-suska.ac.id.

EDUCATION

Universitas Islam Negeri Sultan Syarif Kasim Riau - Pekanbaru, Riau

Sep 2021 - May 2025

Bachelor of Computer Science | GPA: 3.86/4.00

- Relevant Coursework: Organization and Management, IT Project Management, IT Service Management, Enabling Skill, Interpersonal Skill, Business Process Analysis, Business Modeling, Enterprise Architecture.
- Thesis Title: *Pengembangan Sistem Informasi Manajemen Laboratorium Menggunakan Metode Agile Development*.
